

Filaments

Snow Ghosts

Here I am a thinking I was faster than I ever was
Here I sit a wondering how I could be, ever this wrong
Tumbling and tumbling, how can a fall feel this long
Here I sit a wondering how I could be, ever this wrong

Show me the filaments, light my path from here
Show me the filaments, I'm blinded by fear
Show me the filaments, light my path from here
Show me the filaments, I'm blinded by fear
So light me a way

You said you'd use the light inside, to banish the dark
You said I built on borrowed land, but the stars draw our paths

Show me the filaments, light my path from here
Show me the filaments, I'm blinded by fear
Show me the filaments, light my path from here
Show me the filaments, I'm blinded by fear
So light me a way

Tumbling, tumbling, how can a fall feel this
(Light me a way)
Tumbling, tumbling, how can a fall feel this
(Light me a way)
Tumbling, tumbling, how can a fall feel this
(Light me a way)
Tumbling, tumbling, how can a fall feel this long
