

Everything's Here And Nothing's Lost

Snow Patrol

Dancing out of time with everyone around you
Years go by before I hear the beat that you hear
A secret code that you had never tried to crack
It was always in your bones, your blood, your heart, your back
Finish me, I'm tired of being incompleated
Join the dots of me so I can feel my feet and
Don't pretend that we are all not broken pieces
Trying to find the glue before the other beast

Everything's here and nothing's lost
As long as you don't give up on us
We might be broken, might be bruised
But I'm with you anytime, every time you choose

Don't stop feeling even when you're brought so low
The numbness kills us, it'll haunt you deep and slow
And what do I know, would you listen to me go on
Trying to find my voice, I think it's almost gone

Everything's here and nothing's lost
As long as you don't give up on us
We might be broken, might be bruised
But I'm with you anytime, every time you choose

Maybe I love you like the ocean
Like the ocean loves the sky
Never gonna find a way to reach you
No matter how I try
Maybe I can love you like the mountain
Like the mountain loves the snow
I could let you fall on me forever
'Til it's all we know

Everything's here and nothing's lost
As long as you don't give up on us
We might be broken, might be bruised
But I'm with you anytime, every time you choose
I'm with you anytime, every time you choose
