

Come Around

Snowden

I've been silenced by my angry brothers
I've been pushed into line by the pushers and shovers
I've been made into filth by selfish lovers
So don't even bother letting me under your covers

come around you'll come around
come around you'll come around
and it's sad, I know but look how far we've come

Take everyone with a grain of salt
Does that really make you better off?
Look me in the eyes and tell me the truth
Where went the beauty of our youth?
I hope your assumptions are paying off.

come around you'll come around
come around you'll come around
It's spring time for growing
so let's get going let's get going
and I'm glad we know
how we can be so dumb
