

Cool Down

Snowy White

Dreamliner take me to a place
Where I can stop running in the human race
The modern world got an ugly face
Going to leave it all behind

I want to wake in the morning open my eyes
Find myself in paradise
Nothing moving except a gentle breeze
Bringing me the sound of the sea
Cool down, I'm going to cool down, cool down, cool down

There's a window with an island view
There's a window with an island view
A servant girl and her mistress too
I find myself a place in the shade
Put my feet up on the balustrade
Cool down, I'm going to cool down, cool down, cool down

Dreamliner take me to a place
Dreamliner take me to a place
Where I can stop running in this rat race
Every religion got an ugly face
Going to leave it all behind
Cool down, I'm going to cool down, cool down, cool down
