

The Answer

Snowy White

The King leaned forward and lost his crown
His henchmen took some pills and fell right down
I could have told them that they would never find an answer
There was drinking up to saturation
But there was never any conversation
Forever acting, but that will never be an answer

The new ones slip right in and fall in line
I've seen it happen to some friends of mine
They keep on looking, but they will never find an answer
And I am no man to make the same mistake
So I just took as much as I could take
Then I left him, 'cause I am still looking for the answer
