

## Live Before You Die

Social Distortion

When pressures up and the stress is high  
and I wanna bid this world good bye  
I'm gonna bury my frustrations  
grab some of life's satisfactions  
yeah I'm gonna live before I die

I try to find some peace of mind  
when my life's treating me unkind  
pain will be my motivation  
I'm gonna use my imagination  
yeah I'm gonna live before I die

So close your eyes, and embrace your memories  
leave your troubles and your worries far behind  
stop contemplating and start celebrating  
yeah you gotta live before you die

I think of chances I didn't take  
i try to learn from my mistakes, yeah  
I'm tired of being pushed around now  
life ain't gonna drag me down now  
yeah, I'm gonna live before I die

So close your eyes, and embrace your memories  
leave your troubles and your worries far behind  
stop contemplating and start celebrating  
yeah you gotta live before you die
