

# With Teeth

Social Repose

The cops roll up the sirens ring in my ears  
I get to the front can't see through all of these tears  
It's 4:45 in the morning resorting to secondhand reporting  
With the authorities I'm in the minority  
Not thinking you're the waste of time  
This is not a crime, it's the end of a bitter climb  
I haven't heard from you in the weeks  
But they say the barrel is primed

With teeth they swallowed you  
Through your bones they hollowed you  
I know there's nothing wrong with you  
But still through your bones they hollowed you out

Think about your friends, think about your family  
Think about all the things crumbling around me  
Don't go into the dark there is nothing there  
Complete your story arc now come on don't you dare  
Give up on me  
Pop gose the firecracker  
Societal body snatchers  
No sun no light, blurry vision losing sight  
I cry out your name as they wrap your broken mangled frame  
Was it all a dream? I've never heard you scream like that

With teeth they swallowed you  
Through your bones they hollowed you  
I know there's nothing wrong with you  
But still through your bones they hollowed you out

With teeth they swallowed you  
Through your bones they hollowed you  
I know there's nothing wrong with you  
But still through your bones they hollowed you out

Through your bones they hollowed you out  
With teeth they hollowed you out  
Give me your hand  
It's cold and broken  
I'll lie to myself, you'll be fine
