Sodom

They wanted to convert us
But their blind delusion wasn't black enough
We were locked up but escaped
And seed of hate has fallen on a fertile ground

We were despised but always feared
And we never licked your boots

When the dark comes falling from the thundering sky
Released heroic devils from deep inside
There was no other purpose for me and you
In 1982
In 1982

We've always left what matters
Just greasy blood that slipped through our hands
The enemy's remains in filthy streets
No pity grows in the shades of black

The law of the road in dark ravines
With an evil smile on our faces

When the dark comes falling from the thundering sky
Released heroic devils from deep inside
There was no other purpose for me and you
In 1982
In 1982

We've sworn immortal loyalty
To all what Satan spawned
Breaking through the barrier
Between the night and dawn
The chaos that you'll find too late
Your church that we contempt
The loud demise out of control
To bring it to an end
Disordered by infested blood
Dethroned without disgrace
The leadership by godless gods
At least the worms awaits
So bury us, but side by side
And you will realize
We'll meet a few of you in hell
The earthly death we just survive
