Decision Day

My inner conflict My frantic face My desperation Waiting for the final breath My wrong belief My fateful deeds My aweless pride Hope to reach the other side I saw my comrades Yielding up their fate They passed away With water for their final grave Decision day With doom beyond The hell invited me To leave this world With dreams of liberty Decision day Your blind courage Your iron will Your senseless orders War will end in victory Your machine gun fire Your ruling liar Your battle ground Soaked with blood of honor I saw my comrades Yielding up their fate They passed away With water for their final grave Decision day With doom beyond The hell invited me To leave this world With dreams of liberty Decision day Their cold anger Their despite Their misanthropy For men who fought and died Their megalomania Their reign of terror Their armored life A godless hail of fire I saw my comrades Yielding up their fate

Sodom

They passed away With water for their final grave Decision day With doom beyond The hell invited me To leave this world With dreams of liberty Decision day Surrounded by the death Along the beach The doomsday just released So close in front of me Decision day
