Fuck the Police

New age rebellion - anarchy Intoxicated with injustice of law Sneaking lifes - mental decay Practice subversive dirty deeds No acts of grace - stand up and fight You are their slave but never questioned why Born on your knees - don't give a shit You are remote controlled but who is to blame Fuck the police Blaze of anger - deaf and blind The enemy that overshadows us all Out of control - disrotted minds The final judgement and the final day will come Too much pressure - too much power Until the point of no return Interwar period - martial games To find out What they try to ignore Eternal lies - vision of change When the dreams of freedom awake Methods of greed - bleeding hearts An easy target for the one with the gun Empty promises - better left unsaid Illusions shattered by mendacity and hate Supremacy - hungry to kill No more effectual fervent supplication

Sodom
