

Let`s Fight In The Darkness Of Hell

Sodom

Triumph of evil, might of war
Enslave for the devil, his soldiers are raw
Wine for mercy, kill 'em all
Ready for slaughter, rivals to wall

Let's fight in the darkness of hell
Let's fight in the darkness of hell

We love the force, without remorse
Rebels of death, fight 'til last breath
Down with rage in all the age
Violence to virgins, enjoy the sweet blood

Let's fight in the darkness of hell
Let's fight in the darkness of hell

Eat the victims, break their bones
Decapitate children, grind 'em with stones
Mangle the believer, stop the deliver
Strike out their soul, heads will roll

Let's fight in the darkness of hell
Let's fight in the darkness of hell

Let's fight in the darkness of hell
Let's fight in the darkness of hell
Let's fight!
