

Starlight

Sofia Camara

If you couldn't go where I go
I'll tell you now
So you know
I would wait for you
I would wait for you

There's a time and in place
In my heart
Far away
That I save for you
That I save for you

Nobody like goodbyes
But there's no point in telling lies we both know

Should I whisper in your ear
Tell you want you want to hear tonight
Tonight

Don't tell me it's alright
I promised you starlight
It was never the right time
For you to be mine

But the moment I left you go
Was the moment the door was closed
Was the moment I need you most

I'm falling to pieces you see
It's never that easy
Finding someone who's lost all alone

So I'm putting pieces of me
Right into the night sky
Hoping it's leading you home

So follow the starlight

Sending messages you don't see
So I guess there for me
When I'm missing you
Cause I'm miss you

Hope these memories never leave
One day
I believe
They'll bring you back to me
And bring me back to you

Nobody like goodbyes
But there's no point in telling lies we both know

Should I whisper in your ear
Tell you want you want to hear tonight
Tonight

Don't tell me it's alright

I promised you starlight
It was never the right time
For you to be mine

But the moment I left you go
Was the moment the door was closed
Was the moment I need you most

I'm falling to pieces you see
It's never that easy
Finding someone who's lost all alone

So I'm putting pieces of me
Right into the night sky
Hoping it's leading you home

So follow the starlight
