

If I Knew

Sofia Carson

It only happens when you're looking back
In the dark you never see the cracks and then
I saw the light came in
Hit the bottom one too many times
I was hurting from the last goodbye, the end
It's where we began

Always lost the fight
Even when I tried
But here we are
Tonight

If I knew
That every time my heart would break
It'd make the space
For you to take
I would choose
The highs and lows and broken roads
Cuz here we stand
At the end
It was all for

I'm good at running, that's my self defense
Kind of scary when it all makes sense 'cause you
You feel like home to me
You can be steady when the nights get rough
Never though that I was good enough but you
You see what no one sees

If I knew
That every time my heart would break
It'd make the space
For you to take
I would choose
The highs and lows and broken roads
Cuz here we stand
At the end
It was all for you, you
All for you

I'd fall a thousand times
Into darker skies
If I knew it led me here tonight

If I knew
That every time my heart would break
It'd make the space
For you to take
I would choose
The highs and lows and broken roads
Cuz here we stand (Here we stand)
At the end (At the end)

It was all for you, you
It was all for you (It was all for you)
It was all for you, you
It was all for you

It was all for you
