

Do It Again

Sofia Karlberg

Where lights are polychrome
I can see your face
Where nights are white as snow
We are more than friends

Where halves become a whole
We can fill that space
The world unfolds
From a better place

Love comes easy
When you don't want to fall
Goes by
When you've fallen for what you want

So is it only me
Or does this make sense?
Still caught under your influence...

I keep telling myself
Keep on telling myself
That it's out of my head
I won't do it again
Then I do it again

I keep telling myself
Keep on telling myself
That we're over the edge
I won't do it again
Then I do it again

Feel like I can implode
At your fingertips
Without no risk involved
It don't taste like this

You set me off and I don't ever wanna come back
How can I win when the odds are stacked?

Love comes easy
When you don't want to fall
Goes by
When you've fallen for what you want

So is it only me
Or does this make sense?
Still caught under your influence...

I keep telling myself
Keep on telling myself
That it's out of my head
I won't do it again
Then I do it again

I keep telling myself
Keep on telling myself
That we're over the edge

I won't do it again
Then I do it again

I know it's sad but I can't help that I'm still stuck on repeat, babe
So come and rip my heart out
You've put your poison in my veins I can't control what I'm feeling
Still caught under your influence...

I keep telling myself
Keep on telling myself
That it's out of my head
I won't do it again
Then I do it again

I keep telling myself
Keep on telling myself
That we're over the edge
I won't do it again
Then I do it again

I keep telling myself
Keep on telling myself
That it's out of my head
I won't do it again
Then I do it again

I keep telling myself
Keep on telling myself
That we're over the edge
I won't do it again
Then I do it again
