Together Alone

Another day melts into the evening I sit alone and watch the stars Remembering times I think of the past Here in my isolation In the solitary situation Reality hurts Where memories last When you whisper my name in the silence You stop my heart with a touch of violence We'll always be Together alone You're a breath in my ear You're a word in my mind I'm here on my own Just two of a kind Together alone Together alone You share in my deepest secrets You're here in my darkest moment Together alone Together alone You know what I'm always thinking You lift my mood when I'm sinking Together alone Together alone When you're here in my arms I'm dreaming of you Life will end when I stop Believing in you Together alone Together alone You're like a shadow At the edge of my eye Like a chill in the air Like a light in the sky Like the endless peace after we die You're a breath in my ear You're a word in my mind I'm here on my own Just two of a kind Together alone Together alone I don't need anybody I don't want anybody I'm on my own Together alone

Soft Cell

Nobody can understand us Nobody to make demands on us Together alone Together alone And as the bombs are falling I hear a voice that's calling Together alone Together alone You're a breath in my ear You're a word in my mind I'm here on my own Just two of a kind Together alone Together alone Are you listening to me now? Are you listening to me now? Together alone Together alone You're deep in my heart now You're deep in my soul now Together alone Forever alone You're a breath in my ear You're a word in my mind I'm here on my own Just two of a kind Together alone Together alone Together alone Forever alone Are you listening to me now? Are you listening to me now? Together alone Forever alone Together alone Together alone Are you listening to me now? Are you listening to me now?
