

My Religion

Sohodolls

I don't expect you to be lovers for long
I know it's over before it has begun
The way you're treated is just no way what you want
And this obsession's only turning me

Talk to me lover, my lover let's recall the time
We shared a taxi, you told me

All that I need is faith and devotion
And what I feel is a fever inside
Girl there's no need to explain your position
Sin with me, it's my religion
My religion

Visions they haunt me want to tear you apart
Get out of my head and get into my heart
Can't take your stupid games I'm hungry for the start
Want me to reciprocate then here you are

Talk to me lover, my lover, let's recall the time
We shared a taxi, you told me

All that I need is faith and devotion
And what I feel is a fever inside
Girl there's no need to explain your position
Sin with me, it's my religion

Watch me tear off your white shirt
You think it's fun damn it hurts
I'm just a girl and your convert
I'll wipe that rouge right off your smirk
Don't try to restrain me
Contain me or play me
Come on and champagne me
Perfume's all stuck in my throat
I want you so bad that it chokes

All that I need is faith and devotion
And what I feel is a fever inside
Girl there's no need to explain your position
Sin with me, it's my religion
My religion
It's my religion
My religion
