

Death Resonance

Soilwork

At last, it's time to go
It'll collapse beyond us
The old and the sacred charm
Will take them then leave us

All night, I've been trying to reach you
All night, I've been trying to preach you

It's that devil in charge
They won't save me
I will be damned

My mind and my heart will collide, now
She's gone, I know
The power, this feeling, this aching
Where she's gone, I don't know

But the way you've shown lives forever
Little did we know the strength that you possessed
Your strength won't be forgotten

I thought you would last forever
Just give me a sign
Apocalypse await us
'Cause I'm still there, I'm still there

My mind and my heart will collide, now
She's gone, I know
The power, this feeling, this aching
Where she's gone, I don't know
But the way you've shown lives forever
Little did we know the strength that you possessed
The strength that you possessed
Your path
Your charm
Your soul
Denied

I won't enjoy a life defied
You left a scar
You left a scar

Spare me from pain, from fear I know
Please tell me the insight
I would do anything to see you burn
Forgive me, forgive me

My mind and my heart will collide, now
She's gone, I know
The power, this feeling, this aching
Where she's gone, I don't know
But the way you've shown lives forever
Little did we know the strength that you possessed
Your strength won't be forgotten

Your path
Your charm

Your soul
Denied
I won't enjoy a life defied
You left a scar
