Staring through the eyes of a cosmic breed

Through distant skies above the fields

Another face another dimension. A broken circle of human attent ion

Around making my way through the desert plains

I'm a legend a gift from the gods, sirens scream there is no re  $\operatorname{\mathsf{st}}$ 

A diary of a tragical life in this nest

Screaming for victory... Neon rebels will rise Breaking down the barricades... Nailed to the skies

Riding on the winds at the speed of light

Selfish pride is a rebel's might. Cosmic warfare a taste of my life

A gallery of a lifetime under the knife.

An endless voyage in an endless time, remind thoughts of an ancient sign

Staring through the eyes of a cosmic breed through distant skie s above the fields

Destructive thoughts in a narrow void, another mission in galax y 2001

Screaming for victory... Neon rebels will rise Breaking down the barricades... Nailed to the skies

Staring through the eyes of a cosmic breed

Through distant skies above the fields

Another face another dimension. A broken circle of human attent ion

Around making my way through the desert plains

I'm a legend a gift from the gods, sirens scream there is no rest.

A diary of a tragical life in this nest

Killing to stay alive - madness rules here again tear away the golden skies

Neon rebels will reign!
