

# Vultures

Soilwork

No need for apologies  
If you let me in  
No need for astronomy  
Where our space begins

I've been looking for the truth  
In shards of evermore  
Now they're circling over bodies  
Where I used to dwell before

All you vultures

Hold me nameless  
Hold me close  
Hold me breathless  
No one knows (No one knows)

That gaze in your scarlet eyes  
Towards the other side  
Short lived as a dragonfly  
But the end is nigh

Life in itself is an unknown disease  
But I will try to put you at ease  
Those nooks and crannies  
Harboring light  
Fulgur ignis spiritus  
Level the veil tonight

Hold me nameless  
Hold me close  
Hold me breathless  
No one knows (No one knows)

All you vultures  
All you vultures

Hold me nameless  
Hold me close  
Hold me breathless  
No one knows (No one knows)

Hold me nameless  
Hold me close  
Hold me breathless  
No one knows
