

Moving Stones

Soja

You say there's gotta be a better way for you
But see you're staying in the same old groove
Ignoring the fight and blind to the light
You're hoping and praying but never making that move

The earth's just moving in the way it does
Spinning in the space waiting for your want
Do you really need it want you really needed
Slipping from your touch

You could do it right now
Let a little light out
We're moving stones
Looking for the inside
Remembering the real life
We covered up
We covered up

Can you put it down, never pick it back up
Hate it so much that you give it all up
Finding that center do you remember
When you were a kid all you need was love
I guess that kid will never be back again
Looking around at every one of your friends
Some are doing worse so you are feeling better
Never getting up

You could do it right now
Let a little light out
We're moving stones
Looking for the inside
Remembering the real life
We covered up
You could do it right now
Let a little light out
We're moving stones
Looking for the inside
Remembering the real life
We covered up
We covered up

There's a little secret in every one
We say only if we knew what it was
Then we do nothing calling it something
Suffering alone is so much fun
Listening to voices, hearing it loud
Only real point is to drown it out
Do you really want it what you really wanted
Start right now

You could do it right now
Let a little light out
We're moving stones
Looking for the inside
Remembering the real life
We covered up
You could do it right now

Let a little light out
We're moving stones
Looking for the inside
Remembering the real life
We covered up
We covered up
