

## Signature

Soja

We deserve more than lies and illusions  
way more than what we're getting  
We don't remember what life is for  
We believe in the wrong complications  
your ties all stop at nations  
When we could be so much more, so much more

Let it out and if it's true, it will flow out of you  
It's like a river in your mind  
Because the truth will never fall  
it's been around before us all  
and it's like a signature on your mind

We're the first, we're the generation  
We are the ones to be one, this nation starts with us  
it doesn't end when the water does  
And we can see it when we think more clearly  
and keep calm and you keep listening  
or we could find ourselves past the point of no return

Let it out and if it's true, it will flow out of you  
It's like a river in your mind  
Because the truth will never fall  
it's been around before us all  
and it's like a signature on your mind

So get going with the new thought process:  
remember birth and give away the numbness  
Mankind was built on conquest  
NOW'S the time that you give away the unrest  
Unless we can undress all of the past concepts  
and practice a little oneness  
our future generations are just suspect  
subject to our bullshit

Let it out and if it's true, it will flow out of you  
It's like a river in your mind  
Because the truth will never fall  
it's been around before us all  
and it's like a signature on your mind

Let it out and if it's true, it will flow out of you  
It's like a river in your mind  
Because the truth will never fall  
it's been around before us all  
and it's like a signature on your mind  
on your mind
