

Still You

Soja

Growing up, moving on
Alright

I look back on you and me sometimes
And in my memories, I only made you smile
And all the fine print, I don't read it
It don't like me, and who needs this
Reality of realizing that I
Coulda, woulda, shoulda

This song is mine and it's still yours, I'm afraid
So rest assured you're in these words that I say
And I keep talking, as I try to get away
From the truth, it's still you, yeah

Yo, turns out, you were right all along, girl
You and I? Better in a song girl
And this story and all these pages?
Better a memory, better a little faded
'Cause my choice is to keep it a memory
Or sit here remembering everything
And drive myself crazy thinking
Coulda, woulda, shoulda

This song is mine and it's still yours, I'm afraid
So rest assured you're in these words that I say
I sing this one, my same old song for the rest of all my days
'Cause the truth? It's still you

Uh, yeah
I look back (yeah)
On you sometimes

I look back on you and me sometimes
I rewind it like a movie in my mind
And I don't remember all the fights
'Cause they distract me from those nights
When we'd just hold each other tight
Like life perfect
Fuck...

This song is mine and it's still yours, I'm afraid
So rest assured you're in these words that I say
This song is mine and it's still yours, I'm afraid
So rest assured you're in these words that I say

This song is mine and it's still yours, I'm afraid
So rest assured you're in these words that I say
A little song that lets me sleep through time and space
And I get through, it's still you
