

## This Shit

Sol

Man I love this shit, yo I love this shit  
Man I love this shit, hey yo I love this shit... uh

Hey yo there ain't nothing like rumbling on the mic  
Saying something real clever undercover when I write  
Young and wonder what it like, I say it's something like  
Getting in the best pussy you ever had in your life  
Little zombies wanna eat my brains, my mama wanna see me change  
But all I got is the game, I love rapping and that's the way it always has been  
Way before my balls dropped I loved it with a passion  
I got soul, I got so much soul that the devil was given me since I entered the globe  
You don't know the half of it, I'm an automatic writer, futuristic flow  
Keep lasers on the biters, Sol gonna rock on load my bong  
Flow so cold while I hold my schlong  
Let the bees sing j-clean on the sound  
I say fuck the scene only one thing that I'm bout

Man I love this shit, yo love this shit  
Man I love this shit, hey yo love this shit  
Man I love this shit don't you love this shit  
Man I love this shit

When the beat drop out just me and the sample  
You lifted it like I lit a quick spiff it with the candle  
Bump my shit when you high, I make music I can fuck to cruising in my ride  
I don't give a damn what the radio play  
I'ma bump my shit and be my own Dj  
The music ain't what get me laid but the hoes still pullin on my pants when I'm spitting on stage  
I could write pop shit I could write underground  
I could write some nonsense make you buy it right now  
I love that independent music fuck yeah  
Record companies you can suck my nut sack  
See me on the corner moving music like base  
Stuck in the wrong time but at right place  
You see no one likes to buy music these days  
But still I must say

I love this shit, he yo I love this shit  
Man I love this shit, yo I love this shit  
Yo we love this shit, man we live this shit  
Man we love this shit

This shit right here, this that fire put it in the air  
This shit right here, this that fire put it in the air  
This shit right here, this that fire put it in the air  
This shit right here, this'll get you higher than buz light year
