

Cold

Solence

So cold
So freezing cold
Buried ten feet under all the ice and snow
So lost
In this frosty space
Feel my heart go numb inside this chilly place

And the
Chilly winds makes it burn within
Have I always been this blind?

Tell me why does everything feel cold
Don't know if my highs have been this low
I don't wanna do this on my own
Nothing here makes sense
I could use a friend
To get me through the cold

So quiet
In sub zero
On these winter nights I feel a storm unfold

And the chilly winds
Sets a fire within
I can't find the key
So I pinch my skin
But I'm still inside
Of this hazy dream
Has it always felt this dark?

Tell me why does everything feel cold
Don't know if my highs have been this low
I don't wanna do this on my own
Nothing here makes sense
I could use a friend
To get me through the cold

Don't know if I'll make it
Cause everyday feels the same
And I'm slowly going insane
Don't know how to say this
And maybe I'm afraid to change
But I sure can't stay this way

So I'll just play pretend
Till I convince my head
That I can fight, that I will be alright
When darkness finds the light
And every shadow dies
But I know this won't happen
Won't happen over night
Tell me why does everything feel cold
Don't know if my highs have been this low
I don't wanna do this on my own
Nothing here makes sense
I could use a friend
To get me through the cold
