

Serenade

Solence

This moment lasts forever
Cause your presence around me makes time wanna freeze
When I have you near me
I don't know what to say, what to feel, how to be
Inside those eyes I'm paralysed

This is a serenade baby for everytime you make me fall
In my head
I know I shouldn't be near you cause with you I loose control
And everytime I call
I don't know where to start
It's all a spinning blur inside my head
This is a serenade baby for everytime you make me fall

I cannot understand it
How you're making it hard to be me when you're near
It's like you've broken in me
And I'm drunk on the pain and the love I don't know how to end
this

This is a serenade baby for everytime you make me fall
In my head
I know I shouldn't be near you cause with you I loose control
And everytime I call
I don't know where to start
It's all a spinning blur inside my head
This is a serenade baby for everytime you make me fall

This is a serenade baby for everytime you make me fall
In my head
I know I shouldn't be near you cause with you I loose control
And everytime I call
I don't know where to start
It's all a spinning blur inside my head
This is a serenade baby for everytime you make me fall

I'm paralysed

This is a serenade baby for everytime you make me fall
In my head
I know I shouldn't be near you cause with you I loose control
And everytime I call
I don't know where to start
It's all a spinning blur inside my head
This is a serenade baby for everytime you make me fall
