Boogie Man

Solid Base

Sound sample :

He knows you're all alone in the night
He knows you're gonna turn off the light
Do you wanna see who it's gonna be
When you hear the sound
Don't you turn around

The boogie man is hard to find
When he's hiding in the shadows moving in the dark
The boogie man is all around to get you
Boogie man, open up your eyes

Suddently a heart's beating faster (faster)
You realize that this is disaster
Do you wanna see who it's gonna be
When you hear the sound
Don't you turn around

The boogie man is gonna get you even though you pray
No one's gonna hear it doesn't matter what you say
When you feel alone and there is no one else around
He is gonna find you and you will not make a sound
