

Overkill

Solitary Experiments

Just another act of crime
Thousands of innocent lives had to die
The fear and the fright are spreading around
Now we are standing on a trembling ground

The silence clouded by a veil
Corrosive dust turns the day into night
The biting smoke just dims my eyes
There is nothing left to hide behind

We are the suffering of hell
Caused by a terrible overkill
We were touched by the darkness and will always to
remind
To the crucial day as the humanity died

Flames of fire are rising high
Downfalling wreckage from the sky
These attack against our faith and trust
Earns deepest contempt and disgust

Reasons are not to be explained
I am so sorry and ashamed
It's in our nature to destroy
We may not do it justify

We are the suffering of hell
Caused by a terrible overkill
We were touched by the darkness and will always to
remind
To the crucial day as the humanity died

We are the suffering of hell
Caused by a terrible overkill
We were touched by the darkness and will always to
remind
To the crucial day as the humanity died
