

The Essence of Mind

Solitary Experiments

Time is moving faster than your thoughts
Of one moment to the other hand without cause
Unknown destination seems predetermined
You are seeking for an answer where it ends

Refrain:

It's just a simulation, all memories fade away
trapped in repeating timeloop, nothing will remain
This is a new consciousness, subjection of mankind
Keep your eternal secret, what's the essence of mind

Ignore all false promises they've made
clean your soul from stupid minds try to awake
Runing through an labyrinth of fear
it doesn't matter what you want or what you feel

Refrain:

It's just a simulation, all memories fade away
trapped in repeating timeloop, nothing will remain
This is a new consciousness, subjection of mankind
Keep your eternal secret, what's the essence of mind
