

Playing Both Sides

Son Little

Caught you playing both sides
Caught you playing both sides again
They say they love you for your heart
But we both know that it's cold as ice

Is it really 'Us versus Them'
Or would you say there's a war within a war
I just think I can't think all the time
Just to get by, gotta get by

Caught you playing both sides
Caught you playing both sides again
Got you dead to rights
There'll be no compromise
You go spreading your lies again

So we tussle a bit
That white russian's too milk for me
All biased and blind
And we goin' dancing on down the line

Hey world!
I gotta know while we're here
Has the world gone blind
Or am I invisible
Hey world!
I gotta know now what's the plan
Cause if you don't know where you stand
I got a place for you to land

Caught you playing both sides again
Got you dead to rights
And there'll be no compromise
As you go spreading your lies again

Caught you playing both sides
Caught you playing both sides again
You'll be dead to rights
But take a gypsy's advice
The gypsies will rise again
