

## Lucky Ones

Son Volt

Still the lucky ones, they say it's our last chance  
Time is running out in this dangerous dance  
Still the lucky ones with everything to lose  
If we don't chase away these blues  
Chase away these blues

Still the lucky ones, we've seen it all before  
Too early for the lifeboats but be mindful of what's in store  
Still the lucky ones in this ever-changing world  
With so much worth fighting for  
So much worth fighting for

Life is good with you around  
The weight of the world is nowhere to be found  
Life is good, life is good  
When you're around, when you're around

Still the lucky ones, you and me  
With friends to care for and places to be  
Still the lucky ones with friends to care for  
And places to be  
You and me

Still the lucky ones, they say it's our last chance  
Time is running out in this final dance  
Still the lucky ones with everything to lose  
If we don't chase away these blues  
Chase away these blues

Life is good with you around  
The weight of the world is nowhere to be found  
Life is good, life is good  
When you're around, when you're around

Still the lucky ones  
Still the lucky ones  
Still the lucky ones  
Still the lucky ones
