

Satellite

Son Volt

Where you comin' from?
Where you headed?
Society's forecast inclement outcome
Strange days of melody moving
Delta blues bucket will keep you healthy

There's pain in your heart
World of false starts
There's pain in your heart

We'll find a way
Through a satellite
Through a satellite
We'll find a way

Moonlight and the night are past
Orson Welles and Anton Karas
Flip the switch, but we're already gone
Nothing compared to a world that's bleeding

There's pain in your heart
Full of false starts
There's pain in your heart

We'll find a way
Through a satellite
Through a satellite
We'll find a way
