

The Globe / Prelude

Son Volt

People all around the world
Understand what's bad and good
Now's the time to show up
Lost time to make up

You can sense it on the street
Pushing back at authority

People all around the world
Just doing what they should
They know what it's all about
Now's the time to make it count

You can sense it on the street
Pushing back at authority

People climbing skyward stairs
Deciders of their fate
You can see it everywhere
Change is in the air

International power
Of people all around the globe
We're really all the same
We think global and stake that claim

You can see it on the street
Pushing back at authority

The barkers and the house of mirrors
The map shows where to stay clear
The suppression and the whisper campaigns
The word is now and the word is change

You can sense it on the street
Pushing back at authority

People climbing skyward stairs
Deciders of their fate
You can see it everywhere
Change is in the air

Earthbound and down in the lost and found
Bohemian tale as old as time
The wild life and the theater of the mind
Anchors away in a ray of light

You can see it on the street
Pushing back at authority
You can see it on the street
Pushing back at authority
