

## World Waits For You

Son Volt

When the world wants right and wrong  
Could you break me the news  
If i asked you to lie  
Would you tell me the truth

In this darkest hour  
A brave face will break soon  
The world waits for you  
The world waits for you  
Could you carry me through

It's hard to wake up  
Fateful hands that we find  
Promises bogged down

Just chasms to climb

In this darkest hour  
A brave face will break soon  
The world waits for you  
The world waits for you  
Could you carry me through  
Find strength from the words  
Of those that went before  
Take what you need  
But leave even more
