

That's All There Is

Sondre Lerche

That's all there is
A stream of captures
That look you wore
The sunset backwards
Your lips on mine
Our faces backlit
That foreign sign
How we misread it

Heading out to see my love
It has been too long for us
Heading out to see you off
It has not been long enough
Catching up with you again
Catching up is everything
Every moment nears an end
Let's not wait so long again

That's all there is
Some days we had it

That thing you said
The way you said it
Your secret smile will always kill me
That's all there is
Our finest heartbeats
That's all there is
That's all there is
A stream of captures
Somewhere inside
A stream of captures
That's everything
A stream of captures
That's all there is
Our finest heartbeats
That's all there is

That's all there is
That's all there is
That's all there is
That's all there is
