Meet Me on a Rooftop

Sophie B. Hawkins

Meet me on a rooftop, that's where I'm gonna be This party is so old fashioned Nothing is here for me

Meet me on a rooftop, I'll bring the radio We can kick our shoes off and dance really slowly Drink a little moonshine, have fun in clover time

I've been watching you through a fascinating prism Moving in and out of rhythm Climb the fire escape with me We can spin the world around from a first class seat

Meet me on a rooftop Ooh, take a cab to the west side Don't you worry about being so high up Just lie beneath the city sky See Ms. Liberty shine, shine

I've been watching you through a fascinating prism Moving in and out of rhythm Climb the fire escape with me We can spin the world around from a first class seat

You bring the candles And I'll bring the Arnica oil I'll massage your mind until your spine uncoils

You're enticing me with a scintillating schism Dreaming in and out of living Climb in my sleeping bag with me You can spin my head around Until the birds come tweet, tweet, tweet
