

Breathe Me In

Sophie Barker

Breathe, breathe me in
Let me soak through skin
Lie next to me, through the night
Tell me what you see, all your dreams and fantasies
Swimming your head before I sleep

If I fall in the middle of your heart
Whether we ride this life together
Be awake for me
Move over here
Come sit by my side
Hold me closely day and night
Less is more, give me more of what I need
Breathe, breathe, breathe me in

If you fall in the middle of your life
Feel like times running out, we wont break
We will grow together
Know that you are loved, you are loved here and now and forever
I wont let you go 'til the sun burns out on me

Bless this moment, bless this moment, bless this moment
You're the only one, you're the only one, you're the only one
You're the only one, you're the only one
