

moments

Sophie Cates

So caught up, and if it's gonna be love
I'm just caught up in your eyes
Fascinated by your mind
Worry about trust, if there's something more to us
You want to talk all night, I'm just happy with the quiet

I wish that I could calm you down
I wish that I could show you how
Beautiful you look right now
Dance around the room with me
Wow

I hope you're not
Missing these moments
'Cause oh, my god
The feeling is golden
When you're holding me, I'm hearing "Teenage Dream"
It's like a fantasy, I want you here with me
And I hope you're not
Stuck in your head babe
'Cause oh, my god
There's magic in this place
When you look at me, I feel the energy
I feel everything, I want you here with me
Here with me, here with me

I know I only say half of what I mean
It's a problem I've been dealing with since I was seventeen
I want to let you in, I want to show you what I see
But I'm scared that if you get too close
You're gonna wanna leave
I wish that I could let it go
The memories of tears and ghosts
And I can feel you getting closer
Every day you stay with me

I hope you're not
Missing these moments
'Cause oh, my god
The feeling is golden
When you're holding me, I'm hearing "Teenage Dream"
It's like a fantasy, I want you here with me
And I hope you're not
Stuck in your head babe
'Cause oh, my god
There's magic in this place
When you look at me, I feel the energy
I feel everything, I want you here with me

I like, staying in the moment
Maybe it's 'cause I'm broken
Can't imagine someone staying long enough to love me
Long enough to love me
And you, like, think about forever
I hope I can let myself get there
You make it all feel so easy
I hope you don't leave me too soon

Because I'm loving every moment with you

I hope you're not
Missing these moments
'Cause oh, my god
The feeling is golden
When you're holding me, I'm hearing "Teenage Dream"
It's like a fantasy, I want you here with me
And I hope you're not
Stuck in your head babe
'Cause oh, my god
There's magic in this place
When you look at me, I feel the energy
I feel everything, I want you here with me
Here with me
Here with me
