

SUPERNOVA

Sophie Cates

I don't want to be here
Sitting on the front steps
I'm supposed to love you
Why're you always upset?
I would never lie, babe
Why'd you always think that?
I'm the one who watched you
Flirting with your hot friend

Said you wanted good things
You keep getting mad when
Anything I worked towards
Actually happens
Thought I was the last one
To put up with your bullshit
You said that I fixed you
You said that it was different

You're getting way too drunk at your after party
You were numb as shit before it even started
All our friends said it was kinda sad to watch it
But I don't care 'cause you got what you wanted

You just wanna play the victim
But you're the only one who did this
You're getting what you want (want)
Supernova

Guess I'm super stupid
I always believed you
When you told me move in
Baby, let's get hitched too
God damn I'm so grateful
We didn't have kids too
Everything is fucked now
I could never trust you

You're so messed up
But I'm keeping quiet
'Cause I don't get off on starting forest fires
All your friends are worried
'Bout the shit you're tryin'
But I don't care
'Cause you got what you wanted

You just wanna play the victim
But you're the only one who did this
You're getting what you want
Supernova

Supernova
Stand back, watch it blow up
You were solar
But you called it over
Supernova
Couldn't save it
I got no love

So stand back
As you go up in flames, yeah, babe
