

Synchronized

Sophie Ellis-Bextor

Lay still
I know you are breathing
Wired down
And I will focus on the beating

Synchronise our hearts
Synchronise our hearts
Synchronise them

And I lock it up baby
I never said I could win you
But I lock it up tightly
And I am synchronised with you

Hear me
I know you're not sleeping
I can feel your cool skin
Focus on the beating

Synchronise our fall
Synchronise our fall
Synchronise it

And I lock it up baby
I never said I could win you
But I lock it up tightly
And I am synchronised with you

For every sealing that we never really had
For every feeling that was gone before I closed my eyes
