

# The Capitalist

Sophie Hunger

You must leave now  
I have spent you  
There is nothing set aside, no

It's the end now  
I have used you  
Watch me now, I'll kick the door  
You face the light, face the light

Hoo!

Take the road, go take the road  
I beg you  
Nothing here was ever in your hands

We don't need to be friends  
We don't need oh we don't need to understand

Take my coat, go take my coat  
You can have it, have it  
It's okay if you pass it on, p-pass it on

Go forget that it was mine  
Go make somebody stranger smile  
I don't need oh I do not need to, no

Why  
Don't let me know, don't let me know  
Case you make it

I was never, I was never really on your side  
I just like the way they stared at us  
And I like the way that you fell in love  
I really couldn't help wanting to  
Have you  
Have you  
Have you

You must leave now  
I have spent you  
There is nothing left to find

We meant more than we were meant to  
And it was over when we really had to try

You must go now  
I have spent you  
There is nothing left to find

I used it all while you were sleeping  
For the movies on the big screens in my mind  
Whoo!
