Sorn

Pick me up at nine  
Turn the headlights off  
'Cause you know you ain't gonna drive  
'Less you're driving me wild

I'm high on your cologne  
And you're drunk off my red lipstick  
We might overdose  
I should stop but I don't

Don't want the nice and sweet  
I want the ice, the heat  
Want a taste of something dangerous

Let's do everything that's bad for us  
Piss off all the neighbors  
Get our feelings all messed up  
Let's do something crazy for the rush  
Break up just to make up  
Stay up just to fall in lust

Let's do everything that's bad for us  
'Cause it feels so good  
Though we know we shouldn't  
In the name of love  
Let's do everything that's bad for us

Girl, let's make a mess caressing and touching  
Ain't no more talking  
Got my eyes all on you  
Surrendering to your body press it up on me  
Things I would do  
'Til the late nights  
From the bed to the floor  
Shut the headlights  
Way you walk in so amazing girl  
Perfume got me thinking how you tasting girl

Don't want that nice and sweet  
You want that ice, that heat  
I'm in your favor  
I give you danger girl

Let's do everything that's bad for us  
Piss off all the neighbors  
Get our feelings all messed up  
Let's do something crazy for the rush  
Break up just to make up  
Stay up just to fall in lust

Let's do everything that's bad for us  
'Cause it feels so good  
Though we know we shouldn't  
In the name of love  
Let's do everything that's bad for us

'Cause it feels so good

Though we know we shouldn't  
In the name of love  
Let's do everything that's bad for us

Hey, you up?  
So... you wanna come over?  
We could watch a movie or...  
Let's do everything that's bad for us
