Sorn

Pick me up at nine  
Turn the headlights off  
'Cause you know you ain't gonna drive  
Less you're driving me wild

I'm high on your cologne  
And you're drunk off my red lipstick  
We might overdose  
I should stop, but I don't

Don't want the nice  
And sweet  
I want the ice  
The heat  
Want a taste of something dangerous

Let's do everything that's bad for us  
Piss off all the neighbors  
Get our feelings all messed up  
Let's do something crazy for the rush  
Break up just to make up  
Stay up just to fall in lust

Let's do everything that's bad for us  
'Cause it feels so good  
Though we know we shouldn't  
In the name of love  
Let's do everything that's bad for us

Don't know where you've been  
But I know I love the feeling  
Of you on my skin  
So go on, let's pretend that

This is gonna last  
That we're not a couple of users  
Trying to fill their lack  
'Cause I still want it bad

Don't want the nice  
And sweet  
I want the ice  
The heat  
Want a taste of something dangerous

Let's do everything that's bad for us  
Piss off all the neighbors  
Get our feelings all messed up  
Let's do something crazy for the rush  
Break up just to make up  
Stay up just to fall in lust

Let's do everything that's bad for us  
'Cause it feels so good  
Though we know we shouldn't  
In the name of love  
Let's do everything that's bad for us

'Cause it feels so good  
Though we know we shouldn't  
In the name of love  
Let's do everything that's bad for us

Hey, you up?  
So... you wanna come over?  
We could watch a movie or...  
Let's do everything that's bad for us
