

## Lies (Refix)

Sorry

I have to try and hide  
My eyes for you  
You  
And if I could I wish I was  
Just someone else to you

I'm ten feet down and temperamental  
Said I wouldn't, but I went still  
For your mouth, for your mouth

I can play and pretend (Promise me)  
Praise you, promise (Promise me)  
You're my friend (Promise me)  
And habits died  
You know habits lie

These days I just can't keep it together  
And I feel like I'm lighter than a feather (I feel like)  
And life feels like it's just based on weather (Life feels like it's)  
And I make lies like we should be together

Together, together  
Together, together

Ten feet down and temperamental  
Said I wouldn't but I went still  
For your mouth, for your mouth

I can play and pretend  
Praise you, promise (Promise me)  
You're my friend (Promise me)  
And habits died  
You know habits lie

These days I just can't keep it together  
And I feel like I'm lighter than a feather  
And life feels like it's just based on weather  
And I make lies like we should be together  
Together, together  
Together, together

Heaven's waiting  
That's what I've been saying  
Heaven's waiting  
That's what I've been praying
