

Lies

Sorry

I have to try and hide
My eyes for you
And if I could I wish I was
Just someone else to you

I'm ten feet down and temperamental
Said I wouldn't but I went still
For your mouth, for your mouth

I can play and pretend (Promise me)
Praise you, promise (Promise me)
You're my friend (Promise me)
And habits died
You know habits lie
(You know)

These days I just can't keep it together
And I feel like I'm lighter than a feather (I feel like I'm)
And life feels like it's just based on weather (Life feels like
)
And I make lies like we should be together

Make lies, make lies, make lies

Ten feet down and temperamental
Said I wouldn't but I went still
For your mouth, for your mouth

I can play and pretend
Praise you, promise
You're my friend
And habits died
But you know habits lie

These days I just can't keep it together
And I feel like I'm lighter than a feather
And life feels like it's just based on weather
And I make lies like we should be together

Heaven's waiting
That's what I've been saying
Heaven's waiting
That's what I've been praying
