

daydream

SpaceMan Zack

Every time that you drive past my house
I can feel it in the air that you're right out
Side baby girl, what a time now
Can you give me a sign like a light house
Every time that I drive past your street
Think of everything I wish you'd say to me
I get lost in my head, these day dreams
Then I slam my breaks before you break me

Cause you won't hurt my feelings anymore
Oh no, no
I won't let you hurt me like before
No

No never again, no never again
You won't break me ever again
No never again, never again
Cause everything gets fucked up in the end
Never again, never again
You won't break me ever again
Never again, no, never again
Cause everything gets fucked up

Everything gets fucked up
I can still feel your touch
Say the word and I can
And I can give you something
Baby, hate me, never can replace me
Make me, make me
I want you to break me
Just look what you've done to me

Every time that you blow up my phone
I think about it till it hurts and I run home
You are the closest thing I've ever known to that
And every time that you don't call right back
I think about it till my head hurts so bad
You are the one thing keeping me off-track
Tonight

I hate driving down your street
I ain't doing well and I just don't want you to see
You look so damn happy so I don't wanna intrude
You took all my friends so now I have nothing to lose
I should really thank you
I took all the snakes and made myself a halo
I'm chasing bags like I'm pushing out a payload
Another a song, couple digits
My life's going well now that you're no longer in it

Every time that you drive past my house
I can feel it in the air that you're right out
Side baby girl, what a time now
Can you give me a sign like a light house
Every time that I drive past your street
Think of everything I wish you'd say to me
I get lost in my head, these day dreams

Then I slam my breaks before you break me

Cause you won't hurt my feelings anymore

Oh no, no

I won't let you hurt me like before

No

No never again, no never again

You won't break me ever again

No never again, never again

Cause everything gets fucked up in the end

Never again, never again

You won't break me ever again

Never again, no, never again

Cause everything gets fucked up
