

# Kalopsia

SpaceMan Zack

Wait for me baby, we gon' be saved  
(Strung out, strung out)  
Tell 'em to take you with me, we gonna be okay  
(Strung out, strung out)  
I never leave you, I never fade away  
(Strung out, strung out)  
We gonna leave this, we gonna be okay

Oh...  
Strung out, strung out, strung out  
Oh...  
Strung out, strung out, strung out

This one is comin' up straight from the horse  
Take what's yours, no more  
Icarus flew and he still burning up  
Death still knocking on the door  
Taking the word coming straight from the mouth  
Curtains close, take your bow  
Medicine help if you forcing it now  
Blood is wine, wash it down

Gone off the water  
Cup full of vibrant colors  
Walk in the building they telling me some people think that I might have a problem  
Imma be honest  
I think we just fillin' these bodies  
Wait for the day that they comin' you see what I'm talkin', you find who your god is  
Look in the pockets  
These people are thieves dishonest  
Cause everyone copy the swag, they copy the flow, they copy regardless  
I won't be modest  
I done these things they wanted  
I came from the bottom to here, I rather be dead back where I started

Wait for me baby, we gon' be saved  
(Strung out, strung out)  
Tell 'em to take you with me, we gonna be okay  
(Strung out, strung out)  
I never leave you, I never fade away  
(Strung out, strung out)  
We gonna leave this, we gonna be okay

Oh...  
Strung out, strung out, strung out  
Oh...  
Strung out, strung out, strung out
