

## Games

Sparkle

I'm tired of sittin' here thinkin' bout you  
Where you goin', who you wit, and why you ain't called yet  
When the next set a table for two  
With massage, roses and everything  
You used to give me, now is gone  
Out of my mind is where I don't belong  
Already said be careful what you do to me  
'cause it might come back to you

Why you wanna play games, I ain't got time  
Ya see, I can play it better than ya  
Makin' me feel like I should play the same games  
Do you really wanna?  
Still playin' games, I ain't got time  
Ya see, I can play it better than ya  
Makin' me feel like I should play the same games  
Do you really wanna?

You know I could be out there doin' the fool  
With the next nigga wanna spend some time with me  
Even though I'd rather be with you  
It's like, outta sight, outta mind

What do you expect for me to feel  
I ain't got the time to sit and fade around  
Thinkin' bout where you goin', why you ain't called  
Who you wit, whachu doin'

And I don't know what you talkin' about  
You say you need some time to find yourself  
It only sounds like another excuse

Must be someone else  
That you been givin' all your time

Probably trickin' every dime  
While I pay the car note, pay the rent  
Pay the phone bill  
You really need to stop your playin' games

See, if I didn't answer my cell  
Would you trip out?  
And if I didn't answer my page  
Would you freak out?  
If I stayed all night at the club  
Would you bug out?  
And if I had numbers in my pants  
Would you check out?

If I put my girls before you  
Would you stress out?  
Late night calls from my ex  
Would you be out?  
Tricks are for kids silly rabbit, I'm grown  
Please take your games, go on  
Play it on your own

See, I can play it better
