What About

Sparkle

What is gonna happen to us? Think about the children
And all the things you promised me

You say you wanna leave without giving me a reason at all
Boy, I don't understand, what about all these plans we've made?
You vowed that you would stay, do you wanna be a man about it?
Can we talk about it? Don't just leave

What about faithful? What about, what about faithful
And all those things you promised me?
What about the children? What about, what about the children
And how in love we used to be?

At night I lay awake, hoping you will take the time to call me
I hardly see your face, we miss you night and day
How could you just turn and walk away? Do you wanna
Be a man about it? Can we talk about it? Don't just leave

What about faithful? What about, what about faithful
And all those things you promised me?
What about the children? What about, what about the children
And how in love we used to be?

What about the house, the cars, the papers and the mortgage?
What about, what about and our estate that we both own
How could you dare break up our happy home? Oh boy
What about my, what about my life? You made me your wife
What is gonna happen to us?

What about faithful? What about, what about faithful
And all those things you promised me?
What about the children? What about, what about the children
And how in love we used to be?

What about faithful? What about, what about faithful
And all those things you promised me?
What about the children? What about, what about the children
And how in love we used to be?

What about faithful? What about, what about faithful
And all those things you promised me?
What about the children? What about, what about the children
And how in love we used to be?
