

## Endeavor the Dark

Sparzanza

I endeavor the dark  
Forever in loneliness we drift apart  
Where eternity lies  
I'm closing my eyes under the fading star  
I endeavor the dark

I look into the blackened sky  
And the world is passing by  
Flashing right before my eyes  
As I slowly drift away

I'm already gone  
I can't see the sun  
There's nothing but dead space 'round me

I endeavor the dark  
Forever in loneliness we drift apart  
Where eternity lies  
I'm closing my eyes under the fading star  
I endeavor the dark

When I reach the other side  
I've abandoned all the light  
As I'm losing all control  
I surrender to the night

For all of my time  
I've wasted this life  
There's nothing but pain inside me

I endeavor the dark  
Forever in loneliness we drift apart  
Where eternity lies  
I'm closing my eyes under the fading star  
I endeavor the dark
