

## When Death Comes

Sparzanza

I feel so numb, bitter and weak  
I can't pretend life is for me  
Been trapped in the dark for so long now  
It's time to leave, time to get out

When death comes, I will welcome it  
Feeling tired and sick of this  
When death comes it will leave with me

This world is too cold, I'm surrounded by lies  
It's been so long since I felt alive  
This strife is in vain, the suffer and pain  
And slowly my soul is getting drained

When death comes, I will welcome it  
Feeling tired and sick of this  
When death comes it will leave with me

So sick of life  
So black inside  
Alone, I walk this earth alone  
So sick of life  
So down and out  
It's time to step into the fire

When death comes, I will welcome it  
Feeling tired and sick of this  
When death comes it will leave with me

When death comes, I will welcome it  
Feeling tired and sick of this  
When death comes it will leave with me

When death comes  
When death comes
